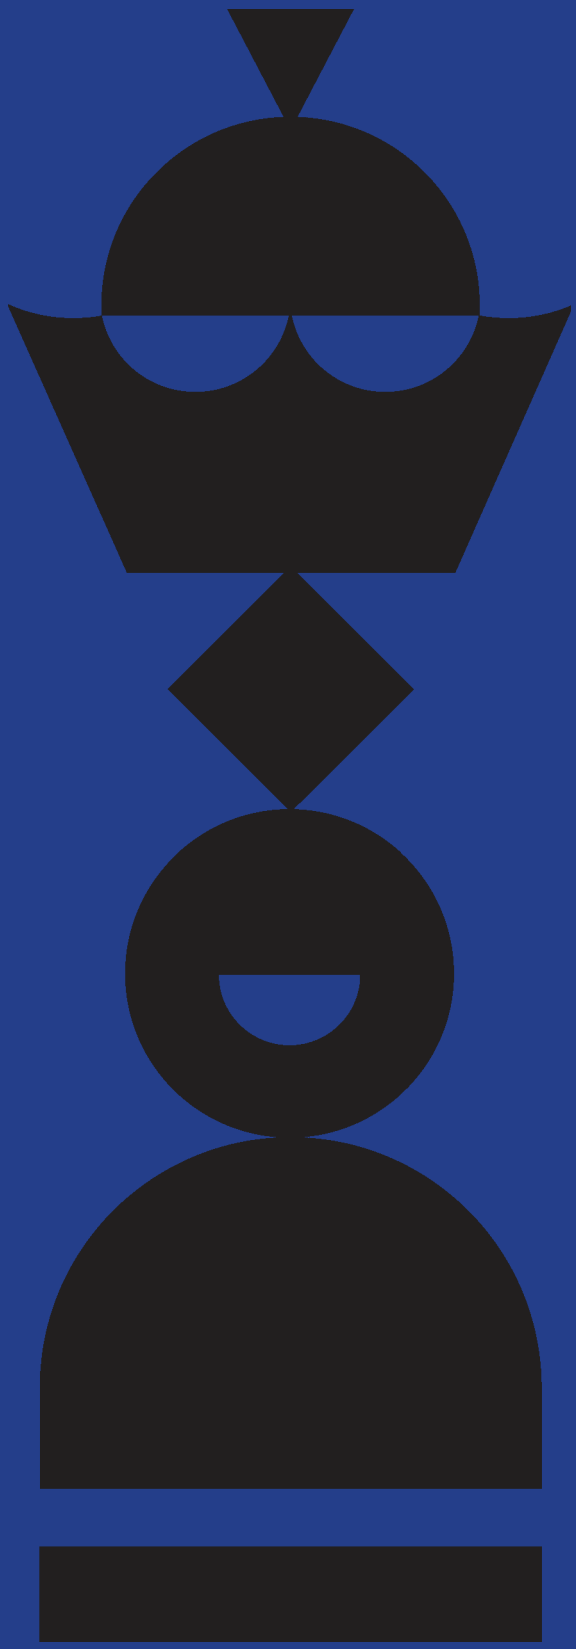
Acoustic Spaces

Calma



Space Reimagined

Developed by Nurus, Calma is more than a pod—it's a thoughtfully engineered space that empowers how we create, perform, and adapt at work. With Class A acoustic insulation, patented return airflow, and ergonomic design, Calma spaces perform by reducing noise and increasing focus. It's quiet strength helps reduce stress, sharpen cognitive function, and reclaim lost productivity.

Whether used for heads-down work, private conversations, or creative collaboration, Calma adapts effortlessly to the shifting needs of modern teams. Modular, mobile, and customizable, it fits into any architectural landscape without compromise. With wellness as a constant thread, Calma creates a perfect environment for deep thought, meaningful connection, and better work.

This is not just privacy—it's purposeful design for a more intelligent, human-centered workplace.

Calma Space to Create

Some ideas need room to breathe. Calma gives you the space to think deeply, explore freely, and create without distraction. It's your personal creative hub within the office—carefully crafted to support focus, flow, and big thinking. Whether you're designing, writing, planning, or problem-solving, Calma provides a calm, inspiring backdrop for meaningful endeavors. It's not just a pod—it's a catalyst for invention.

Calma Space to Perform

When you need to block out the noise and explore what matters, Calma delivers. With Class A soundproofing, optimized acoustics, and warm, daylight-mimicking lighting, it creates a focused environment that supports clarity and productivity. Power, HDMI, and USB ports are built right in—so your devices stay charged and meetings run smoothly. A patented airflow system keeps fresh air circulating, helping you stay sharp and comfortable hour after hour. Durable, sustainable, and engineered for long-term performance, Calma is where your best work gets done—quietly and confidently.

Calma Space to Adapt

Work doesn't always happen in one place—or one way. Calma flexes with your needs, from busy offices to hybrid spaces and everything in between. Its clean, minimal design integrates into almost any environment, while ADA-compliant access and multiple size options make it inclusive and flexible. From quick stand-ups to long collaborative sessions, Calma scales to fit your budget and your space—without compromising on quality. In essence, Calma is easy to move, easy to love, and built to last.

Calma

Space to Care

Built to Sustain—Gracefully

At Nurus, sustainability isn't an endgame; it's our opening principle. Calma acoustic spaces are produced using 100% solar energy inside a 95% vertically integrated, zero-waste facility. This tight-knit supply chain minimizes Scope 3 carbon emissions and ensures accountability from start to finish.

Each component—from FSC-certified wood to 50% recycled PET felt—is carefully chosen. The HDF powder coating process emits zero VOCs and provides a durable, antibacterial surface cured at low heat for reduced energy consumption. Basotect G+ insulation also boosts acoustic performance and earns Calma its Indoor Air Quality Gold Certification.

With an Environmental Product Declaration (EPD) and 100% recyclable packaging, Calma plays a long game in sustainability—designed to serve and made to last.

Crafted in Confidence

With over 100 years of innovation and a 45,000 sqm advanced production facility, Nurus crafts every Calma pod in-house. From aluminium injection to advanced robotics and polymer research, each component is executed with precision and care.

This full-circle control ensures unmatched quality, consistency, and speed. Headquartered in Ankara, with warehouses in Germany and North America, Nurus delivers Calma efficiently across the globe. Every detail is a deliberate move. Every Calma space, a product of strategic foresight.
