DO NOT THROW AWAY THIS MANUAL.

Important Safety and Product Information

1.0 - Preface

This installation manual provides a detailed description on how to install the Calma. Each person involved in the installation of the Calma should read and be aware of the dangers and warnings highlighted in the instructions to achieve maximum safety during the installation process.

This manual contains all the necessary information to correctly install the Calma pod.

All product information and installation manuals can be found on our website:
www.calma.nurus.com

1.1 - Manual Contents

This installation manual contains general information about :

- The installation instructions of the Calma pod.
- Safety information
- Guidelines on the purpose and content of the instructions

1.2 - Product Information

The information in this manual reflects the product at the time of delivery. All details provided are accurate as of the publication date.

1.3 - Intended Use

The Calma pod is intended for short-term interior use in commercial spaces to be used by one person at a time only.

Warning:

WARNING - To prevent burns, fire, electric shock, or injury, only use the product as intended and avoid using accessories not approved by the manufacturer

1.4 - Non-conventional Use

Any product use or maintenance not specifically authorized in the installation, maintenance, or user manuals is forbidden. This includes:

- Installing, maintaining, or disassembling the pod without fully understanding the provided instructions
- Using the pod beyond its specified limits
- Modifying or changing the structure of the pod
- Operating the pod despite visible defects or damage
- Using the pod outdoors or in unsafe temperature or air quality conditions
- Climbing on or placing heavy objects on the roof of the product
- Smoking inside the pod

1.4.1 - Operating Conditions

The pod is designed to function under the following conditions:

- Temperature range: +15°C to +30°C (59°F to 86°F)
- Maximum humidity: 50%
- Adequate air quality around the product

1.5 - Warning, safety and information symbols in this manual

The warnings in this manual are categorized as follows:

- The term "**DANGER**" signifies a hazardous situation that, if not avoided, will lead to death or serious injury.
- The term "**WARNING**" refers to a hazardous situation that, if not avoided, could lead to death or injury.

The safety symbols in this manual may also appear on the product. Anyone involved in installation, disassembly, maintenance, or use of the product must be familiar with and follow all safety symbols, labels, and instructions for the tasks they are performing.

Table 1: Hazard

	The symbol of an exclamation mark within a colored triangle signifies a dangerous situation.
	

Table 2: Mandatory

	A white symbol within a colored circle signifies an action that needs to be taken to prevent a hazardous situation.
---	---

Table 3: Prohibited Action

	A circle with a diagonal line shows an action that is prohibited.
---	---

1.6 - Main safety risks to the installation, maintenance, disassembly and use of the product

1.6.1: Installation, maintenance, and disassembly

	WARNING! To prevent burns, fire, electric shocks, or injuries, follow these safety instructions:
	Wear cut-resistant gloves when installing, maintaining, or taking apart the product.
	Wear steel-toed boots while performing installation, maintenance, or disassembly of the product.
	Be sure to read and fully understand the instructions and plan your task ahead of time.
	Follow all local workplace safety rules and regulations
	Keep the work area clean and free from clutter during installation, maintenance, or disassembly.
	Do not climb on top of the product or place any load on the roof of the product.
	When moving the pod, ensure that the Calma is on its casters to move around easily. Do not move the Calma without ensuring the casters are on the ground.

	Do not use the product if the ventilation is not working.
	Do not use the product if the ventilation channels are blocked. Ensure the channels are clear of lint, hair, and similar obstructions.
	If you observe any electrical defects or the product isn't functioning correctly, unplug it and contact the dealer or manufacturer immediately.
	Do not insert or drop anything into any opening unless you are specifically instructed to do so.
	The product is not intended for outdoor use.
	Do not use aerosol (spray) products where there is no oxygen supply
	Do not climb on top of the product or place any load on the roof of the product.
	Do not lean on the pod.
	Do not smoke inside the pod.
	Do not block the view through the front and back glass panels by adding signs, decorations, or installing blinds that prevent people from seeing inside in case of emergencies.
	DANGER! When cleaning and doing maintenance on the Calma, ensure that the power cord is disconnected from the power outlet to avoid electric shock.
	ATTENTION! The Calma will only work with a 100-120 V AC circuit which has a grounding prong. Do not use an adapter with this product otherwise it could affect the function of the pod. Pay attention that the power cord is plugged into a socket which has a grounding prong inlet like the one shown below. 

1.6.2: Moving the product on casters

	WARNING! The product is very heavy. Moving the product on the casters requires planning and care. Make sure the product cannot tip over while moving.
	Only move the product on even surfaces: no crack or thresholds over 3mm (1/8in) on the intended route.
	When moving the product, only push below the vertical middle. Do not tow the product.
	Do not enter the product if it is standing on the casters. It is only allowed to use the casters for moving the product. Return the full weight of the product onto the leveling feet immediately after relocation and level the floor.

4.0 – Main Dimensions

Front Side

Right Side

The Calma is intended for interior use in commercial spaces only. It is to be used by one person at a time.

WARNING – To reduce the risk of burns, fire, electric shock, or injury to persons; use this product **only** for its intended use. Do not use attachments not recommended by the manufacturer.

ATTENTION!

- The roof of the Calma and the ceiling of the building should have a minimum distance of 200 mm / 8 inches between them.

WARNING –

If the fan units are too close to the ceiling of the building, the airflow within the Calma will not function properly.

4.1 – Required Working Space

- When installing the Calma pod, ensure that the working space during the installation is no less than 25m². The casters should also only be engaged after the pod has been fully constructed in order to move it into place.
- It is also recommended to construct the Calma small as close to its final position as possible to avoid moving it after the installation.
- The Calma offers the option of installing a sprinkler system inside the pod through a designated space on the ceiling which can be opened.
